

Trans-Textil - Corporate Vision and Mission

1. Our vision

To provide the market with textile products that ensure well-being and protection.

To develop and make such products according to the state of the art in compliance with statutory requirements and with respect for the environment.

To provide our products at competitive prices and be flexible enough to supply them at short notice.

To satisfy our customers and stakeholders and convince them of the quality of our work.

2. Our mission

To provide our customers with expert advice on fabric systems and furnish them with high-quality products developed or customised according to their requirements and in keeping with environmental concerns.

To offer our products at an attractive price/performance ratio and constantly broaden our know-how in the area of primary products and end-use applications.

To meet market and environmental requirements by continuously improving our products and technologies.

To strive for organic growth by

- gaining international partners
- tapping new application areas and niche markets
- improving our value creation

all on the basis of maintaining profitability and the high quality of our processes and products while taking environment considerations into account.

To consider the environmental impact of our work in our decision-making, and avoid, reduce and recycle waste.

3. Meeting our mission

We seek to meet our mission with the help of/by:

- recognising and fulfilling customer and end user needs
- ensuring that our employees are experienced, conscientious and kept well-informed
- a certified management system
- documented process control and fault detection and avoidance
- on-going fostering of in-house quality consciousness and environmental awareness
- intensive collaboration with suppliers, business partners and regulatory authorities
- environmentally-compatible improvements to our production processes
- regular reviews of our vision and mission
